

Build Guide: Doodle Bot

1 Explore your materials

Doodle Bot kit includes:

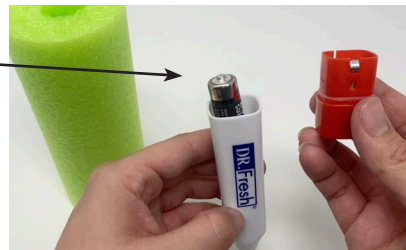

- 1 Foam Body
- 1 Vibration Motor
- 1 AA Battery
- 2 Large Eyes
- 2 Rubber bands
- 3 Feathers
- 2 Pipe Cleaners
- 3 Markers

2 Insert battery into motor as shown.

The flat end of the battery (-) goes in first, with the pointy end (+) at the top as shown.

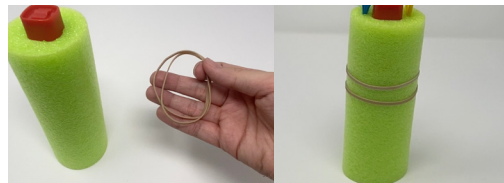

If motor does not activate when switched on, rotate motor cap to new position and try again.

3 Insert motor into the foam body leaving only the colored cap showing.

4 Slide rubber bands around foam body as shown

5 Decorate your Doodle Bot with feathers and pipe cleaners.

6 Attach eyes by peeling off the white paper from the backs.

7 Slide your three colored markers between the rubber bands and the foam body as shown.

8 Remove marker caps and place Doodle Bot on paper. Then, turn on your motor and watch the magic happen.
